# THE MAIDEN BUDGET: TOWARDS THE TRILLION DOLLAR DREAM

The Modi 2.0's maiden budget aimed to build a vision and set the tone for an India of the future. There was an intent made public – to make the country a USD 5 Trillion economy by 2024. The setting of the ambitious target in itself is commendable. The Hon'ble Finance Minister then reiterated Government's action plan to achieve this desired growth, virtually touching every important aspect of that new India. In this piece, we take a look at the broad direction set by the government in this crucial first year of the second term of Modi.

After a pre-election, populist budget in February this year, the Modi government presented a Union Budget which was grounded, pragmatic and devoid of any populist headlines. India's first full-time

women Finance Minister Nirmala Sitharaman focused on keeping the status quo on many things but also gave the broad direction the government would pursue to achieve the target set for the economy. Not surprisingly, the Budget laid emphasis on developing infrastructure, strengthening the banking and financial services sector, attracting foreign investments and promoting start-ups / entrepreneurship. The tax proposals aimed to stimulate growth, promote affordable housing and keep the growth momentum on direct tax collections. It is also clear that the focus of the government will be the village, poor and the farmer with the allocation to rural programmes increased by a huge 42% to stand at Rs 2.21 lakh crores in this budget.

## Key tax related Proposals:

→ No change in personal income tax rates. 3% surcharge hike on an income of ₹2 crores; 7% on ₹5 crores and above. The drastic increase and the resultant tax rate of 42.74% for the super-rich is making headline.

→ To discourage cash transactions, cash withdrawals in excess of ₹1 crore from a bank account in a year, would be subject to TDS at the rate of 2% w.e.f. 1st September 2019.

→ To promote affordable housing, an additional tax deduction up to ₹1.50 lakhs for interest paid on loans taken to acquire a residential property of up to Rs 45 lakhs.

→ To stimulate business growth, corporate tax of all companies having an annual turnover of up to ₹400 crores (earlier ₹250 crores) now slashed to 25%. This now covers about 99.3% of all corporates in India.

→ To generate more revenues, Special additional duty and road and infrastructure cess on fuel to be hiked by 1 rupee. Customs duty on gold and precious items increased from 10% to 12.5%. Duty on many other items also raised where the domestic industry is now capable of meeting demands.

→ To promote electric vehicles (EV), GST council already requested to lower the GST from 12% to 5%. Also, ₹1.5 lakh income tax deduction for interest payments for a loan taken for the purchase of EVs proposed. Customs duty on certain parts also proposed to be exempted.

→ Business establishments with annual turnover of more than ₹50 crores may offer low-cost digital payments. No charges or merchant discount rates (MDR) to be imposed on customers or merchants for these payments.

## Broad reforms / policy / regulatory directions:

→ The multiple labour laws to be streamlined into a set of four labour codes.

→ Rental laws to be reformed. Modern tenancy laws to be shared to promote rental housing.

→ Regulation authority over housing finance sector to be returned to RBI. Strengthening of regulatory authority of the RBI over NBFCs.

→ Government to modify the present policy of retaining 51% stake in PSUs and strategic disinvestment of select Central PSUs to be on priority.

→ Focus on infrastructure, national highways, railways, and airways. Plans to upgrade existing rural roads over the next

five years. Comprehensive restructuring of national highways for creation of a National Highways Grid of desirable capacity.

Proposal to provide ₹70,000 crores capital infusion for PSU Banks. For purchase of high-rated pooled assets of NBFCs, amounting to a total of ₹1 lakh crore, the government will provide one time six months partial credit guarantee to PSU banks for first loss of up to 10 percent

Government to open FDI in aviation, insurance, and media. Local sourcing norms will be relaxed for the single-brand retail sector.

### Markets /investments:

To allow FIIs & FPIs investment in debt securities issued by NBFCs.

Guarantee Enhancement Corporation to be set up long-term bonds with specific focus on infra sector

Propose Social Stock Exchange under SEBI for listing social enterprises & voluntary organisations.

To merge the NRI portfolio route with FPI route.

SEBI to explore increasing minimum public shareholding to 35% from 25%.

### Vision for a new India:

**CLEAN INDIA:** Proposal to expand the Swachh Bharat mission to undertake solid waste management in every village. India to be open defecation free by October 2, 2019.

**RESEARCH:** Establish a National Research Foundation to fund, coordinate and promote research in the country. It will strengthen the overall research set up in the country and integrate all plans & fund allocations in different ministries.

**EDUCATION:** New National Educational

Policy to be brought in to transform the education system. Major changes in the higher as well as the school system to be introduced. 'Study in India' to bring more foreign students to study in India.

**SKILLS:** Stand-up India schemes focusing on skill development to be extended to the year 2025. New skills like Artificial Intelligence (AI), Virtual Reality (VR), robotics, internet of things (IoT), etc. to be promoted.

**ENTREPRENEURSHIP:** 'Angel Tax' fears of startups appropriately addressed. A new dedicated channel for educating and promoting start-ups. Women SHG Interest Subvention Programme to be expanded to all districts in India. Every verified woman SHG member having a Jan Dhan account can avail ₹5,000 rupees overdraft facility and ₹1 lakh loan to be provided for SHG women members under Mudra Scheme. 80 Livelihood business incubators and 20 technology business incubators to be set up to develop 75,000 skilled entrepreneurs in agro-rural industries.

**RURAL:** Provision of housing, electricity, clean cooking facility, toilets, safe and adequate drinking water to all in rural India.

**WATER:** Encouragement of rainwater harvesting, groundwater recharge, and management of household wastewater for reuse in agriculture. Har Ghar Jal – to all rural household by 2024.

**SOCIAL SECURITY:** Pension benefit to be extended to around 3 crore retail traders and shopkeepers with annual turnover less than 1.5 crore under Pradhan Mantri Karam Yogi Man Dhan scheme.

From the market's perspective though, there was no immediate good news or any announcement of a fiscal stimulus package. On the contrary, announcements like increase in long-term capital gains tax for Foreign Portfolio Investors (FPIs), buyback tax and plans to increase in public shareholding after few years did spread some negative vibes. Overall, this Budget was seen as more of a mission and vision statement of the government and as an indicative of what can be expected in the next 5 years. The budget also demonstrated Government's outlook for India's future and made a clear statement that, aside from the socio-economic reforms, this Government will equally focus on tax reforms to spur growth.

# VISION NEW INDIA

# BEING SUCCESSFUL AT INVESTING

All investors have one common goal – get better returns or performance out of their portfolio. While not all investors can be successful, all successful investors do display some characteristics which can be followed by other investors. Mind you, these characteristics are easier said than followed. In this article, we will talk about the most common characteristics and approaches to be successful at investing.

### Set realistic goals and investment objectives:

Having a fair and reasonable expectation

from your investment is the first thing that investors should learn about. The investment objective should be aligned to the investment asset class, risk appetite and

your expectations from the portfolio. Any imbalance in these key elements is bound to find friction and conflicts. If one is unreasonable, he/she will probably end up

making the wrong decisions. While working with an advisor, it also becomes important that you share your expectations and investment objectives and then arrive at mutually acceptable details of the same. Having the right expectations from your advisor is also an important element of successful investing for investors.

### **Be disciplined and patient:**

As investors, we should understand that not doing anything in the markets also counts as a decision or strategy. There have been many studies which have showcased that rather than attempting to time the markets, just spending time in the markets is much more beneficial to the investors. Making steady but low returns is much more preferred in the long run than making random high and low returns over the long term. This patience becomes very important if you consider yourself as a long term investor. Discipline in your investment approach or strategy is another key success factor. If you are investing in a disciplined fashion, market movement and levels will no longer be important for you over time. Small investments, made regularly can deliver exemplary returns as compared to unplanned, random lumpsum investments. Being disciplined and patient also involves ignoring market distractions and noises.

### **Look at diversification and asset allocation**

Diversification and asset allocation are a couple of investment strategies which have proved themselves to be indispensable to the investors. Having the right asset allocation on your total portfolio is perhaps the most critical factor for deciding your portfolio performance. How would a 15% returns on your equity portfolio matter if it is only 10% of your portfolio? The right mix of asset allocation – say into equities, debt and real estate or other physical assets should be appropriately managed in accordance with your risk appetite. Similarly, diversification is also important but one should be careful as to not over-diversify into too many asset classes, products or AMCs or schemes. Only a reasonable amount of diversification would be beneficial for your portfolio. An investor should periodically review his/her portfolio asset allocation and diversification with the advisor.

### **Minimise the number and intensity of your mistakes**

Warren Buffet strongly advocated making fewer investing mistakes to be successful at investing. While some of your investment decisions will surely help you reap good returns, it is often the mistakes that you make that destroy your returns. A good investment portfolio in quality mutual fund schemes will definitely help you create wealth. However, if you make some financial

mistakes, that will surely eat up all your progress. Hence, it pays if you play it safe and not make mistakes. Also, the quantum of money put at stake for risky financial decisions bears huge significance. Make sure that any risk you are taking is only with money which you could afford to lose without any significant impact on your portfolio. By rule, know that any investment “guaranteeing” high returns is too good to be true and is not possible in the market. If you want high returns with risk, equities should be your go-to asset class.

### **Know your expertise and your limits**

The great Sachin Tendulkar once realised that his cover drive was not working against the Australians. He decided to not play that shot, a very common one, in his entire innings in that one match and ended up making a very good score. The point being, one has to know one's areas of expertise and your limits and work accordingly. If you are good in your profession, business and making money out of it, stay focused and continue doing that with all passion. If you are not so good at identifying stocks, leave that work to the fund managers, don't try to become one. The idea is not to stretch ourselves and try to become experts at

everything. Managing wealth or money requires a certain amount of time, knowledge, efforts, market awareness, product familiarity and freedom from personal bias. It would be great if you have everything, but it would not be so great if you are overconfident of your skills and expertise. You will only end up hurting your wealth.

### **Be responsible**

Being responsible for your investments would mean a certain level of seriousness and commitment to your financial plans and investment strategies. It would also mean that you value your money and would not take undue risks or decisions which are not in line with your stated objectives or contrary to the advice from your advisor. Being responsible would also mean that you are a professional and adopt an unbiased, ego-free, open attitude and approach to managing investments. Being responsible would also mean that you share the important things with your advisor that directly or indirectly may impact your finances. Lastly, being responsible would also mean that you listen and follow the mutually decided decisions with your financial advisor, in a time bound manner, giving it the priority it deserves.

**Mr. Harsha Upadhyaya**  
Chief Investment Officer –  
Equity - Kotak MF

Mr. Harsha Upadhyaya, CFA serves as the Chief Investment Officer of Equity and Fund Manager at Kotak Mahindra Asset Management Company Limited. He joined the fund house in August 2012. He served as Senior Vice President and Portfolio Manager at DSP BlackRock Investment Managers Pvt. Ltd. He previously served as a Senior Vice President and Head of Equity at Kotak Mahindra Asset Management Company Limited. He served as Vice President and Fund Manager of Equities at UTI Asset Management Company (P) Ltd. until July 21, 2011. Mr. Upadhyaya has several years of experience spread over equity research and fund management. His prior stints have been with companies such as DSP BlackRock, UTI Asset Management, Reliance Group, and SG Asia Securities. Mr. Upadhyaya has received the CFA charter from the CFA Institute. He received a PGDM in Finance from the Indian Institute of Management, Lucknow in 1996. Mr. Upadhyaya also earned a Bachelor of Engineering in Mechanical Engineering from the National Institute of Technology, Suratkal in 1993.

**Q. What is your overall take on the economy w.r.t. to the growth potential in the near and medium term?**

**Answer:** India is largely domestic focussed economy. Both infrastructure and consumption sides drive Indian economy. The consumption driven sectors such as automobiles, consumer durables, consumer staples etc have a large runway for growth in the long term given the large population base, demography, expected income growth and relatively low penetration levels. However, currently there seem to be a cyclical downturn with weaker consumer demand. We do not expect government to provide sector specific stimulus, if any. Hence, these sectors may remain weak in the immediate term, while the long term potential is significantly higher.

We expect continued focus on infrastructure development in the country, given those activities also generate high levels of employment. We anticipate government policy actions to support infrastructure creation and economic activity.

During the first term, the Government had created a framework around these broad areas:

- 1) Introduction of macro- economic stability with special focus on inflation targeting
- 2) Framework for last mile delivery of social benefits to underprivileged section of the society
- 3) Implementation of Insolvency and Bankruptcy Code for facilitating exit framework for resolving insolvencies
- 4) Implementation of GST as National Indirect tax system
- 5) Infrastructure development across the nation

With a solid framework in place, the Government would look to capitalize on these reforms for furthering economic growth.

India's share in the global export trade is tiny. The US-China trade war has created many opportunities- focus will be on growing the share of Indian exports. We expect the government to focus on creating and growing the export oriented private sector.

The government is likely to promote a domestic savings driven investment led growth model. Providing adequate liquidity at lower interest rates for businesses will also be critical to revive slowing corporate growth in recent times.

We view two investment-related reforms as being critical to enhance India's investment rate—(1) reforms in factors of production including labour and land and (2) review of the role of the government in business (privatization of state owned businesses) and changes to extant ownership and pricing policies to encourage greater FDI and private investment in the critical infrastructure sector.

**Q. Are we going through a slowdown in consumption and even an overall slowdown? If yes, when is the story likely to turn around?**

**Answer:** The consumption slowdown in the economy is very visible now, has adversely impacted overall economic growth in the recent times. The slowdown which started in discretionary consumption businesses has now spread to some non-discretionary segments too. However, we view the current slowdown more as a cyclical in nature rather than a structural one. High base, lower disposable income, lack credit availability from NBFC segment have all resulted in slowdown in consumer demand. Weak rural economy has also added to misery. We do not expect any significant turnaround in consumption demand at least for next couple of quarters. The pace of recovery is likely to be dependent on normalcy in NBFC segment, rural recovery and any policy initiatives to revive demand.

**Q. How much of a market risk do you see w.r.t. to this new government?**

**Answer:** The incumbent BJP-led NDA coalition has won the elections convincingly by winning around 350 seats in the lower house of the Indian parliament, higher than its tally in the 2014 elections. The BJP crossed the half-way mark on its own, and got nearly two-thirds majority with allies, implying a stable government. By 2020 the BJP and its allies should also have a majority in the upper house, making legislative change easier. The market has viewed the return of the incumbent government positively; it will expect the government to announce further economic and governance reforms over the next few months. Policy continuity and predictability are the biggest positives for the Indian economy.

## MF NEWS

### SEBI tightens regulations for troubled debt mutual funds

The Securities and Exchange Board of India (SEBI) has tightened rules for debt mutual funds in the wake of the recent credit crisis that led to the values of these schemes taking a hit. The regulator has made early redemptions from liquid funds more expensive and strengthened norms for debt mutual fund's lending against shares to make these products safer for investors. This, along with a raft of decisions including stricter disclosures for promoter's share pledges, easier norms for issue of shares with differential voting rights (DVRs) and minority shareholder approval for higher royalty payments, were taken at the regulator's board meeting. SEBI also expressed its disapproval of the so-called standstill agreement that mutual funds have reached with the indebted Essel Group. SEBI mandated that liquid schemes of MFs should hold at least 20% in assets such as government papers and cash, a move aimed at improving risk management and liquidity. It also said an exit load will be levied on investors of liquid schemes who get out of such investments within seven days.

### MF industry adds over 5 lakh folios in May

In May, the MF industry witnessed addition of 5.05 lakh new folios, taking the aggregate folio count to 8.32 crore from 8.27 crore in April, shows AMFI data. The increase in aggregate folios was largely due to a sharp rise in large cap fund folios which added 5.60 lakh new folios. With this, the aggregate folio count in large cap schemes rose to 87.40 lakh, from 81.79 lakh in April. Consequently, AUM of large cap schemes also witnessed a sharp uptick. As on May 31, assets managed under large cap schemes stood at ₹1.41 lakh crore, 10% higher than the ₹1.26 lakh crore at the end of April. Among debt funds, the highest number of folios were added in liquid funds. With 41,297 new folios in May, aggregate folio count in liquid funds rose to 14.93 lakh from 14.51 lakh. As on May 31, AUM of liquid funds stood at ₹ 5.49 lakh crore, as against ₹ 4.78 lakh crore at the end of April.

## NEWS UPDATE

### 'Indian' agenda for Modi 2.0: Eco Survey projects 7% GDP growth in 2019-20

In the first Economic Survey of Prime Minister Narendra Modi's second term, new Chief Economic Advisor KV Subramanian constructed a growth template for India that he claimed was a 'departure' from 'traditional Anglo-Saxon thinking'. The Survey argued that economies were rarely in 'equilibrium' but rather in either a vicious or a virtuous cycle, and went on to make the case for investment as the key driver of job creation, exports, demand, and economic growth. The Survey commended the government on service delivery and macro-economic stabilisation and projected growth of 7 per cent in 2019-20. While acknowledging that growth had slowed over 2018-19, it argued that was due to a base effect, a decline in government final consumption, low acreage of the rabi crop, and 'election-related uncertainty'.

### Achieving \$5 trillion economy by 2024-25 eminently doable: Niti Aayog

Vice-chairman of Niti Aayog Rajiv Kumar has said the target of achieving an economy of \$5 trillion within 2024-25 was 'eminently' doable and the private sector would have to take the lead. Speaking at the AGM of Indian Chamber of Commerce here, Kumar said the government alone would not be able to meet the target of achieving the \$5 trillion economy. It cannot be done by the government alone. The private investors would have to take the lead, Kumar said. The Niti Aayog vice-chairperson said, there are several initiatives mentioned in the budget which point out to the willingness of the government to work along with the private sector. These included hike in the disinvestment target, governmental support to NBFCs and long-term plan to deepen the corporate bond markets.

### India added record 1,836 Mw of rooftop solar power in last fiscal: Report

Rooftop solar power in India grew at a robust pace with the country adding a record 1,836 Mw in the last fiscal. At the end of FY19, the overall installed rooftop solar capacity stood at 4,375

## NEWS UPDATE

Mw, soaring 72 per cent over FY18, a report by Bridge to India showed. The fresh capacity addition came from commercial, industrial, public sector and residential projects. With a nameplate capacity of 2,140 Mw, the industrial segment is the biggest contributor to the solar rooftop power portfolio. Rooftop solar power continues to grow consistently and is gaining increasing share of the market.

### India's current account deficit narrows sharply to 0.7% of GDP in Q4

India's current account deficit (CAD) narrowed sharply to 0.7 per cent of the gross domestic product (GDP) in the fourth quarter ended March 31, 2019 (Q4), from 2.7 per cent in the third quarter ended December 2018, primarily on account of a lower trade deficit, even as foreign portfolio inflows remained robust. In Q4FY18, the CAD stood at 1.8 per cent of GDP. However, it rose to 2.1 per cent of GDP in FY19 from 1.8 per cent in FY18 'on the back of a widening trade deficit', the Reserve Bank of India said in a statement on its website. In FY19, there was net outflow of portfolio funds of \$2.4 billion, against an inflow of \$22.1 billion a year ago. The trade deficit for the full year increased to \$180.3 billion in FY19 from \$160 billion in FY18.

### Trump, at G-20, says there will be 'very big' trade deals with India, Japan

President Trump struck a conciliatory tone with other world leaders as the Group of 20 summit got started, saying there would be 'very big' trade deals to announce with India and Japan. Mr. Trump didn't provide specifics as he held meetings with Japanese Prime Minister Shinzo Abe and Indian Prime Minister Narendra Modi. But he praised both, assuaging concerns that he would provoke new tensions at the summit of the world's 20 leading economies. Before the summit, Mr. Trump said on Twitter that Indian tariffs recently announced against the U.S. were 'unacceptable' and 'must be withdrawn.'

### Fiscal deficit hits 52% of budgeted target in first two months of FY20

The Centre's fiscal deficit for the first two months of 2019-20 came in at ₹3.66 trillion, or 52 per cent of the full-year target of ₹7.04 trillion. It was

## NEWS UPDATE

55.3 per cent for the same period last year. Ahead of the Union Budget on July 5, which will be the first by new Finance Minister Nirmala Sitharaman, the data released by the Controller General of Accounts (CGA) showed the fiscal deficit for April-May was kept in reasonable check in spite of heavy front-loading of expenditure. This was done by keeping spending in ministries such as Agriculture, Civil Aviation, Coal, Power, Road Transport, Rural Development, and Steel at a much lower level than in the same period last year.

### Finance Ministry cuts small savings interest rates for July-Sept quarter

The finance ministry, cut interest rates for all but one of the 12 small savings schemes for the July-September quarter. This has been done in a bid to speed up the transmission of interest rates and to reduce cost of capital and enable higher lending and thus boost economic activity. A notification on the finance ministry website showed that interest rates for all the small savings schemes, except savings deposits, were reduced by 10 basis points. The savings deposit interest rate was maintained at 4 per cent. That the interest rates would be cut was expected. Reducing the cost of capital to boost investment has been a stated aim of the Narendra Modi administration in its second term. Part of that was done when the Reserve Bank of India's Monetary Policy Committee (MPC) cut interest rates thrice. Now the small savings rates have been reduced to speed up the transmission of the interest rates.

### Financial system stable; dud assets fall sharply to 9.3% in FY19: RBI

The Reserve Bank of India (RBI) has said the proportion of commercial lender's non-performing assets (NPAs) may fall slightly to 9% by March, but recommended that the vigil on non-banking finance companies (NBFCs) continues. The financial system remains stable despite some dislocation of late, said the RBI in its bi-annual Financial Stability Report (FSR). As the banks, especially the state-run ones, are on the mend, the structure of non-banking credit intermediation should focus on developing on more prudent lines, said RBI governor Shaktikanta Das.
